

RESEARCH-BASED ARGUMENT ESSAY: COLLAGE TEXTS  
assembled by Ryan Call

Gene Morgan's Twitter Feed Press, 2009

Clearly there has to be a point where everything begins.

For starters, make costumes and run about,  
or take archery lessons.

Consider that when using the word juvenile as a noun,  
the definition is a young person or a youth.  
When used as an adjective to describe someone,  
the word means immature, childish, or youthful.

Imagine one of your family members being caught  
in the wrong place at the wrong time.

Try to imagine potential damages alone.  
When the government has the ability to spend several trillion dollars per year,  
how much will a jury be willing to give a wronged individual who is  
weak, disfigured, or dying?

This monster that has been unleashed continues to grow  
and we have to take a stand.

I thought if I made a mistake,  
I could simply do things over and over as I pleased,  
but I soon came to find out that I was wrong.

She told me she had already shopped for some clothes for the baby  
without even knowing the sex of the baby.

One time I looked down a hole that was in a stall  
and I could see the person  
sitting on the toilet below me.

Some couples pretend that their abortion was a miscarriage  
to escape from people's judgment.

To this day she carries around a hairdryer  
outside with her  
while riding around in her car  
for protection against potential homeless attackers.

Now if you ask me  
that defense is inadequate.

We as humans like to keep ourselves happy;  
therefore, we do what makes us happy.

I've even heard of parents buying a sack,  
anywhere from a dime or a nick,  
from their own children.

On the one hand,  
I am in full agreement with this.

One of the main things children do on a daily basis  
is watch tv.

On the other hand,  
once a juvenile offender  
is convicted in a criminal court as an adult,  
their record is permanently scarred.

Who am I to tell them  
how to raise their children  
or how they should look at life?

All around the world,  
all parents have problems.

Out of the many political issues  
that politicians have to deal with,  
abortion is one of the top subjects.

When they initially start,  
the way that they hold down the young girl  
can make her fear people  
in a way that she thinks that  
everyone is out to get her,  
and causes her to be fearful of others.

Whether you can get this help  
depends on your income,  
where you live,  
other help you receive,  
and other items.

The medical supplies  
range from  
surgery rooms  
and X-ray machines  
to simple items,  
such as  
gauzes  
and  
alcohol.

And every single one of you can have your say,  
just as I am doing now.

Circumcision has its rights and wrongs.

This might seem a little harsh to some people,  
but I believe if you cut the problem at its roots,  
the rest will fix itself.

The Secretary of the Treasury is not just a glorified accountant anymore.

Instead, he spends most of his time insulting  
the presidents of the United States and allied countries.

He was the victim of brutal child abuse.

There are many Americans out there  
that are also in his shoes,  
but some are less fortunate.

These are sad and horrible times.

Individuals classified as severely retarded  
require daily supervision during tasks.

That is how our society works.  
Society is just like a guideline to how life works.  
Though my life was like this,  
society around me was different.

As seen in my video introduction,  
the authorities do not very well approve of  
the whole subject either.

Incentives are a great way to foster enthusiasm in the workplace.

For example, if you have an extra finger  
you can perfectly work like any person with five fingers.  
You could type the same way  
a person with five fingers does.  
You could eat the same way;  
you could do all the household chores  
the same way as a person with five fingers.

A clean and sterile hospital will be of use.

My proposal has the interest of the people in mind.

If someone were to say to me, "Hey I know someone  
that doesn't know how to read and they are living a normal life,"  
I would have to say in return, "Really? So how does it feel  
having to ask someone to read for you  
when you are in need of knowing  
what has been written?"

Nobody should be subject to such pains and sufferings, not even animals.

This brings me to my next findings

I don't know about you,  
but a world without Chinese food  
or Taco Bell's ninety nine cent steak quesadillas  
would be torture.

At times we all feel like we have to become a Christian Scientist just so we can get an affordable health care plan.

Michael Cannon states that  
the universal health care system in Canada  
forces patients to wait over six months  
for a routine pap smear.

He tells stories of seeing men getting stabbed and raped on a daily basis.

To my knowledge,  
this is the only gang with this  
unique characteristic.

Simply put, there was no longer a demand for whales.

If you give a child a book and tell him to read,  
he will read,  
but if you give him the book and tell him he can do anything with it,  
it leaves him with more decisions to follow;  
his own decisions.

When you really get into deep thinking  
about reading and writing,  
it all comes down to letters.

This article is not an attack on people who are living together before marriage.

We all know from real life situations  
that no one likes people  
that are the source of negativity.  
You know,  
like naggers, complainers,  
just people that attack your sunshine  
at any and every opportunity.

But can blind people live a normal life?  
To a blind person the whole world is black.
